

vBound 4.1.0 – Release Notes

Release Date: 1/2/17

Enhancements

Feature/Function	Description
Transfer	Added a new function to transfer firearms from one vBound 'book' to another. The process will disposition firearms from the current book and acquisition them into whatever book you choose. The <Transfer> function is available on the vBound Main Menu ribbon.
Disposition	Added the capability to print a "Packing List" report after a disposition instead of the standard "Disposition Report". There is now a setting for each of the disposition types for each book that allows you to select your preferred report. <i>NOTE: Additional reports may be added in future versions via customer requests.</i>
FFL List	Added the column "Expiration Date" to the FFL List. <i>NOTE: The standard list functionality allows you to sort by any column on the list, so you can change the view to see any FFL's on your list that have been expired or are near expiration.</i>
Acquisition	A new button "Add from Previous Disposition" is on the Acquisition List ribbon menu. This allows you to add all the firearms from a previous Disposition into a current Acquisition. <i>NOTE: This will be especially useful to our Manufacturer (07) customers.</i>

Bugs/Fixes

Feature/Function	Description
Current Book Setup	Book settings allows you to select a default type for both Acquisitions and Dispositions. The default Acquisition Type however was not working.
User Login Setup	Function modified to allow a User Login that includes a space (e.g. "John Doe") if desired.
Acquisition and Disposition	The <Delete Number> button displayed on the Multiple Serial Number Wizard when entering items in a list was not deleting items. It has been fixed.
Application	Various modifications to fix spelling errors, improve the look of a form/report, change wording, etc.
