

vBound 4.1.1 – Release Notes

Release Date: 10/11/17

Enhancements

Feature/Function	Description
Inquiry (Correction/Void)	A new function has been added to allow you to make a correction or void on multiple serial numbers at one time. The button <Correct/Void Multiple> is available on the Inquiry List form. <i>NOTE: This will be especially useful to our Manufacturer (07) customers, or those who acquire/dispose firearms in large groups.</i>
Acquisition	The Multiple Serial Number Wizard has been updated to allow you to import a list of serial numbers from a file. The file needs to be either an Excel file or a csv text file. Please see the updated User Guide for file specification information.
Acquisition	The “Acquire from Previous Disposition” function was updated to now include a total count of the firearms per disposition. This will help you correctly identify dispositions when using this function.
Acquisition	A new function “Acquire from File” has been added to the Acquisition ribbon menu. This function allows you to import a list of firearms into an Acquisition from a properly formatted Excel or text file. Please see the updated User Guide for file specification information.

Bugs/Fixes

Feature/Function	Description
Application	Various modifications to fix spelling errors, improve the look of a form/report, change wording, etc.
